WHO WE ARE

Pixel House Design (Pty) Ltd is a Namibian printing, branding, signage and manufacturing company providing complete visual communication solutions to corporate, commercial, retail and industrial clients.

Established in 2018 and based in Windhoek, Pixel House brings more than 32 years of combined team experience across printing, signage, fabrication, branding and installation.

Through continued investment in industrial production technology, skilled personnel and operational capacity, Pixel House is equipped to manage projects from initial concept and site assessment through design, production, fabrication, installation and final project sign-off.

Our production environment combines large-format digital printing, industrial UV flatbed printing, digital commercial printing, CNC routing, precision digital cutting, automated letter bending, laser processing, vinyl cutting, fabrication and finishing.

This allows Pixel House to offer clients something significantly more valuable than individual printed products.

Pixel House is supported by a broader Namibian business group with operational experience across events, audiovisual production, technology, retail, procurement and project delivery. This backing provides additional commercial, logistical and management capability for larger projects.

A SINGLE ACCOUNTABLE PARTNER CAPABLE OF MANAGING COMPLETE BRANDING, SIGNAGE AND ROLLOUT PROJECTS FROM CONCEPT TO COMPLETION.

PRODUCTION INFRASTRUCTURE

LARGE-FORMAT DIGITAL PRODUCTION

Bringing big ideas to life with high-quality large format printing for impactful indoor and outdoor applications. From vibrant branding to detailed graphics, we deliver exceptional print quality, consistency and scale.

INDUSTRIAL UV FLATBED PRINTING

Direct-to-substrate printing for premium, durable and highly detailed applications. We print directly onto a wide range of rigid materials, delivering exceptional colour, precision and professional finishes for signage, displays, branding and custom applications.

CNC ROUTING & PRECISION MANUFACTURING

Precision manufacturing for complex shapes, detailed components and custom-built solutions. From intricate cutting and engraving to large-scale fabrication, we combine accuracy and consistency to turn digital designs into precisely engineered products.

PRODUCTION INFRASTRUCTURE

PIXEL
HOUSE

DIGITAL FLATBED CUTTING

Complete point-of-sale solutions, from print to precision cutting. We produce custom POS displays, promotional units and retail branding with exceptional detail, accuracy and consistency. Ready for efficient assembly and installation. Combining high-quality UV printing with digital cutting.

AUTOMATED LETTER BENDING

Precision-crafted lettering for signage that demands attention. We produce high-quality 3D letters and dimensional signage with clean, consistent returns, exceptional accuracy and a premium finish. Delivering professional results built to stand out and creating signage that looks as impressive up close as it does from a distance.

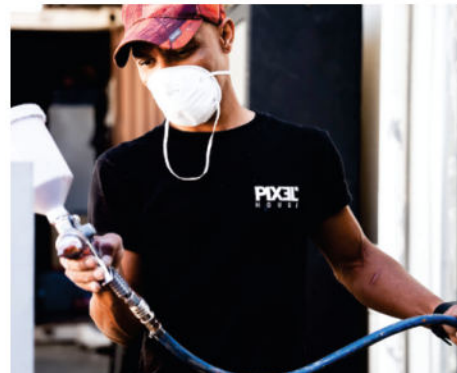

COMMERCIAL DIGITAL PRINTING

High-quality digital printing for professional marketing and communication materials. With exceptional colour accuracy, sharp detail and efficient production, we deliver everything from business stationery and brochures to premium marketing collateral and high-volume print applications.

LASER PRODUCTION

Precision cutting and engraving for detailed, custom applications. We produce intricate designs, components and branded products with clean edges, fine detail and consistent results across a wide range of materials.

FABRICATION WORKSHOP

Where ideas become finished products. Our skilled fabrication team handles everything from signage and woodworking to custom structures and installations, delivering quality workmanship from our workshop to sites nationwide.

PRODUCTION INFRASTRUCTURE

END-TO-END CAPABILITY

We can take responsibility for the complete workflow:

Survey → Design →
Production → Fabrication →
Quality Control → Logistics
→ Installation → Reporting
→ Sign-Off

PRODUCTION CAPACITY

Multiple printing and manufacturing systems provide the capacity required for larger projects while reducing dependency on a single production machine.

MANUFACTURING FLEXIBILITY

Our combination of roll-to-roll printing, UV flatbed printing, commercial digital printing, CNC routing, digital cutting, automated letter bending, laser processing and fabrication means different technologies can be combined within one project.

BRAND CONSISTENCY

Centralised production helps maintain consistency across vehicles, buildings, signage, retail environments and printed collateral.

SCALABILITY

The same production infrastructure that manufactures one customised sign can support larger facility, fleet and multi-site programmes.

Our investment in modern production technology means a significant portion of the work can be manufactured under our direct control.

That provides greater control over:

Quality. Colour. Materials. Scheduling. Consistency. Turnaround.

ONE PARTNER. ONE STANDARD. ONE POINT OF RESPONSIBILITY.

OUR CORE CAPABILITIES

- Large-Format Digital Printing
- Industrial UV Flatbed Printing
- Commercial Digital Printing
- CNC Routing and Precision Manufacturing
- Digital Flatbed Cutting
- Automated Channel-letter and Letter-bending Production
- Laser Cutting and Engraving
- Vinyl Cutting and Plotting
- Vehicle Wraps and Fleet Branding
- Signage Fabrication
- Illuminated and Architectural Signage
- Retail and Point-of-Sale Manufacturing
- Corporate and Facility Branding
- Promotional and Event Branding
- Installation
- Site Surveys
- Multi-site Rollout Management
- Project Coordination and Completion Reporting

PRODUCTS AND SERVICES

CORPORATE AND MULTI-SITE ROLLOUTS

One of Pixel House's core strengths is the management of corporate branding across multiple facilities, branches, vehicles and operating companies.

**ONE CORPORATE IDENTITY. MULTIPLE SITES.
CONTROLLED EXECUTION.**

QUALITY, SAFETY, WARRANTIES AND SUPPORT

QUALITY CONTROL

At Pixel House Design (Pty) Ltd, quality is built into every stage of our production process. From artwork approval and material selection to manufacturing, finishing and final installation, each project undergoes multiple quality checks to ensure accuracy, durability and a professional finish.

All artwork is verified against client-approved proofs and / or samples when required before production, and completed products are inspected prior to dispatch or installation to ensure they meet our high quality standards and client specifications.

HEALTH & SAFETY COMPLIANCE

The safety of our employees, clients and the public is a priority.

Our installation teams adhere to industry best practices and follow site-specific health and safety requirements at all times.

Appropriate personal protective equipment (PPE) is used where required, and work is carried out using safe operating procedures and suitable equipment. We continuously promote a culture of safety through staff awareness and responsible work practices.

WARRANTIES

Pixel House stands behind the quality of its workmanship.

Warranty periods vary depending on the product, application and materials used, with all manufacturer warranties on media, vinyl, hardware and other supplied components being passed on to the client where applicable.

Any workmanship-related issues identified within the applicable warranty period will be assessed and rectified promptly.

AFTER-SALES SUPPORT

Our commitment to our clients extends well beyond project completion.

We provide responsive after-sales support, including maintenance advice, repairs, replacement of damaged components, additional branding, and future expansions of existing signage or branding projects.

Our team remains available to assist clients with any queries or support requirements, ensuring long-term value and lasting business relationships.
